

Insul-Bright®

The Warm Company is pleased to present Insul~Bright, an insulated thermal lining ideal for home sewing enthusiasts and crafters. With today's focus shifting to family and home, new and experienced crafters are choosing practical projects for use in thier homes and as gifts. Pot holders, oven mitts and casserole covers are all very popular projects made functional and safe with Insul~Bright.

Insul~Bright's secret is a metallized polyester film needled with polyester fibers. The special film reflects hot and cold energy back to its source making it ideal for keeping school lunches cold or keeping casseroles hot! The multi-purpose Insul~Bright lining is very easy to use in a wide variety of crafting projects giving crafters the ability to create gift bags for all kinds of temperature sensitive gifts like chilled wine or even the main dish for the family potluck.

Oven Mitt Directions

Enlarge this pattern by 30% following pattern along stitch lines

1. Cut two 9" x 12" pieces of Insul~Bright, *Warm & Natural cotton batting, cover fabric and lining fabric.
2. Trace enlarged oven mitt pattern on the right side of one piece of cover fabric. Trace a reversed pattern on the right side of the other piece of cover fabric.
3. Layer oven mitt fabrics together in this order: cover fabric, Insul~Bright, Warm & Natural, lining fabric. If desired sew a cross hatch pattern or evenly spaced straight lines across all layers. Zigzag stitch through all layers on the traced outline. Trim away excess from edges.
4. Bind entire cuff edge with bias binding - if desired, add a hanging loop using a 5 inch length of ribbon under the binding.
5. Lay the sets of fabric together with lining fabrics facing out. Zigzag stitch around edges EXCEPT the cuff edge. Trim away excess fabric. Turn right side out and ENJOY!

*Use with at least one layer of cotton batting such as Warm & Natural, Warm & White, Warm & Plush or Warm 100 to absorb condensation caused by steam vapor.

Use Insul~Bright right out of the package; there is no wrong or right side.

NOT INTENDED FOR
MICROWAVE USE

Care Instructions

No prewash necessary. Machine wash and dry finished projects. Warm iron if needed.

Lavar a máquina en agua tibia.

Plancha si es necesario.

Laver a la machine chaude.
